

Milliken Carpet

High Performance Loop Pile Modular Carpet

Milliken's high performance level loop pile modular carpet combines beautiful aesthetics with exceptional wear performance.

Engineered to Perform

- Utilises a high performance Antron® yarn which is twisted for enhanced appearance retention. Yarn is de-lustred to give a wool-like appearance.
- Robust manufacturing process makes each module dimensionally stable and free from problems of fraying or unravelling.
- Milliken's unique Millitron® Imaging technology creates deep and sophisticated textural aesthetics.
- Precisely modulated patterning provides highly accurate pattern registration through the digital placement of colour.

Comfort Plus²® High Performance Cushion Backing System.

Manufactured from 85% recycled open cell polyurethane, Milliken's unique modular carpet backing system provides a lightweight sustainable solution with outstanding benefits:

- Protects the surface of the carpet by absorbing the effects of wear, keeping the carpet looking good for longer. Comfort Plus® backed products carry an industry leading 15 year wear guarantee.

- Absorbs 36dB of sound which considerably reduces the disruption of reverberative noise.
- Luxurious underfoot comfort which offers reduced leg muscle fatigue.
- Spring-like structures within the backing act like tiny shock absorbers to soak up the impact of heavy objects placed upon them. Recovers back up to 93% of its original thickness.

TractionBack® Clean, Flexible Carpet Installation System

TractionBack is a remarkable new high-friction coating which prevents lateral movement of carpet. This patented innovation not only keeps your carpet securely in place, it does so without the need for wet adhesives, floor sealers or primers. This means that installing, moving or replacing modular carpet is easier on the end user as well as being kinder on the environment.

Product Enhancements

StainSmart® is a proprietary treatment applied to select Milliken modular carpets to provide Stain Repel, Stain Resist and Soil Release characteristics. This treatment provides state-of-the-art protection against penetrating stains and soil.

Stain Repel: StainSmart allows many liquid spills to be blotted and removed easily before they can penetrate beyond the carpet surface.

Stain Resist: This chemistry blocks the dye sites of nylon fibre, lessening the ability of a stain to bond with the fibre.

Soil Release: Prevents soil from adhering to or imbedding in the fibre surface and enhances the efficiency of soil removal when proper cleaning techniques are followed.

Proper maintenance is vital to the long-term effectiveness of the StainSmart treatment.

AlphaSan® Anti-microbial Protection. Milliken's advanced, toxin-free formulation which good indoor air quality by inhibiting bacterial and fungal growth that can cause odours.

Guarantees

- 15 Year Wear
- 15 Year visual equivalent availability
- Latent defects

Environmentally Responsible

- BRE Environmental Profile A Rating
- 85% Recycled content cushion backing

Delivery

Despatched within 10 working days from order placement (up to 1000m²).
Minimum quantity 3.34m².
